

HYDRECO HYDRAULICS AT HILLHEAD SHOW, UK

Hydreco Hydraulics, the company of the Diplomatic Group specialized in the design and production of Motion Solutions for mobile applications, participates in the Hillhead show, the UK's largest quarrying, construction and recycling exhibition, scheduled in Buxton (Derbyshire), UK, from 21 to 23 June with the new range of external gear pumps & motor (stand PC 47).

Poole, UK, June 21st, 2022 - Hydreco Hydraulics will be exhibiting at Hillhead, the largest construction equipment, mining and recycling exhibition in the UK, that will take place in Buxton, Derbyshire, June 21-23, 2022, featuring more than 600 exhibitors.

The quarrying exhibition is celebrating 40 years this year. Over the past four decades Hillhead has grown from the humble beginnings of their very first exhibition held in 1982 at Jackdae Crag, to the spectacular experience it is today.

At the show Hydreco Hydraulics presents its Cast Iron Gear Pumps, PTOs and Gear Motors alongside Joysticks, Control Blocks (Cetop and bankable options) and World Series Range (WSP).

Hydreco's new range of Aluminum External Gear Pumps, made in the new production site in Parma, Italy, will also be displayed at the show. The HY series is provided with an aluminium alloy housing, two gear wheels supported by sleeve bearings and cast-iron flange and cover. Available as pumps and motors, offers high efficiency and can be applied in standard and heavy-duty application, thanks to the high reliability and the accuracy of design and production. The pumps can be supplied as single, or as multiple units with a huge variety of options on flanges, shafts and ports, providing the right setup on each application. Feel free to contact your Hydreco representative to find out more and to get the proper support in your selection.

It is possible to combine pump requirements with control manifolds, this can be cetop or bankable designs, matched to application. Hydreco in fact can also produce and designs solutions of any dimensions of manifolds, taking into account not only the fluid dynamics but also the weight and positioning constraints on the manifolds themselves, in relation to the machine and with multiple surface treatments depending on the operating environment.

Hydreco Hydraulics team is available for meetings with customers, interested parties at **stand PC47**.

Hydreco Hydraulics, based in Poole, UK, was acquired in 2019 by the Diplomatic MS Group, of Parabiago (Milan, Italy). The group has a turnover of 147 million euros and over 650 employees. Hydreco Hydraulics has a long and significant heritage in the world of hydraulic components: for over a hundred years it has been designing, manufacturing, and distributing products for the transport and mobile hydraulics sector: with offices and plants in Italy, Norway, Germany, USA, India, and Australia, Hydreco has a worldwide production and sales network. www.hydreco.com **Press info:** Sara Bernardelli, sbernardelli@hydreco.com
