

**HYDRECO TO SHOWCASE MOBILE HYDRAULIC SOLUTIONS FOR MINING,
QUARRYING AND MATERIAL PROCESSING AT HILLHEAD 2026**

At Hillhead 2026, Hydreco will highlight its expertise in hydraulic solutions for mobile machinery operating in mining, quarrying and material processing. Visitors to Stand PC45 (Screeners, Crushers & Mining Area) will discover technologies designed to enhance productivity, reliability and machine uptime in some of the industry's most demanding applications.

Poole, UK, June 15th, 2026 - Hydreco will participate in Hillhead 2026, the UK's largest exhibition dedicated to quarrying, construction and recycling equipment, taking place from 23 to 25 June in Buxton, Derbyshire. Visitors can meet the Hydreco team at Stand PC45 in the Screeners, Crushers & Mining area. Held every two years within a working quarry, Hillhead attracts around 600 exhibitors and nearly 20,000 industry professionals, making it one of the most important events for manufacturers and operators involved in heavy-duty mobile equipment.

At the exhibition, Hydreco will present a range of hydraulic technologies designed for demanding mobile applications in the mining, quarrying and material processing sectors. Products on display will include hydraulic pumps and motors, valves, joysticks, cylinders and other key components engineered to deliver reliability, efficiency and long service life in harsh operating environments.

While Hydreco is recognized worldwide for its high-quality hydraulic components, the company's approach is centered on helping customers solve application challenges and improve machine performance. Working closely with OEMs, Hydreco combines hydraulic expertise, application knowledge, a highly experienced team and a worldwide network of distributors and partners to develop integrated solutions that improve efficiency, reliability and productivity across a wide range of mobile machinery. From quarrying and mining equipment to screening, crushing and material handling applications, Hydreco supports customers in selecting and integrating the most suitable hydraulic technologies to meet demanding operational requirements while reducing complexity and maximizing machine uptime.

"Customers today are looking for more than components," says Martin McPoland, Sales Director. "They need partners who understand their machines, their applications and their business objectives. Our role is to combine product expertise, application knowledge and global support to help customers develop equipment that performs reliably, efficiently and competitively in the field."

With more than 100 years of experience in hydraulic technology, Hydreco Hydraulics has built a strong reputation supporting manufacturers of mobile machinery worldwide. Today, as the mobile applications brand of Duplomatic Motion Solutions, a Daikin Group company, Hydreco develops hydraulic and electro-hydraulic solutions for sectors including construction, mining, material handling, agriculture and transport. Combining a century of engineering heritage with the global strength of the Daikin Group, Hydreco supports OEMs through a worldwide network of engineering, manufacturing and customer support operations.
