

PRESS RELEASE

Hydreco Showcases Advanced Hydraulic Solutions at 2025 Brisbane Truck Show

Seven Hills, NSW, Australia – May 22nd, 2025 – Hydreco Australia took part in the 2025 Brisbane Truck Show, held from May 15 to 18 at the Brisbane Convention & Exhibition Centre, presenting its most recent hydraulic technologies designed for the transport and mobile equipment sectors.

At Stand 165, the company introduced its new **Endurant and Euro Power Take-Offs (PTOs)**, engineered for high performance, reliability and efficiency under demanding operating conditions. Also featured was a **closed-coupled water pump**, designed for compact installations where space constraints must be met without compromising flow or durability.

Interactive displays and live demonstrations provided visitors with hands-on insights into the capabilities and advantages of Hydreco's product range. Engagement was strong across the four-day event, with meaningful discussions taking place with OEMs, distributors, and professionals from across the heavy vehicle industry.

Hydreco's **Western Australia operation** played a key role in the exhibition, contributing next-generation **rear of cab frame systems**. Their engineering expertise played a critical role in presenting a complete, integrated hydraulic solution

With a longstanding engineering presence in Australia, Hydreco continues to drive innovation and product optimization tailored to local operating conditions. This focus has led to continuous advancements in sealing technologies, material specifications and energy-efficient components, ensuring performance and reliability across diverse applications.

The 2025 edition of the Brisbane Truck Show welcomed over 40,000 attendees, reinforcing its status as the leading transport industry event in the Southern Hemisphere and providing a valuable platform for continued engagement with key stakeholders.
